error and bounds at t = 10, γ_c = 1
global bound ∝ N²; certificate and error flat
global bound (Thm B3)
commutator-form certificate (Thm B3′)
observed |Δn_c|
system size N
N = 100: certificate (solid) above observed error (dashed)
γ_c = 0
γ_c = 1
γ_c = 4
time t [1/J]
