(a) linear growth, early excursion in state 2
connected mean ZZ over all pairs
t (ms)
connected, state 1
connected, state 2
(b) no decay with distance: a global process
connected ZZ slope, t >= 2 ms (per ms)
ion distance |i - j|
state 1
state 2
(c) the neutral error does not depend on the flips
calibration factor, t > 1.5 ms
Xb15
Xb15u
Xb15uf
Xb15uc
q=0 Z_i, state 2
q=0 Z_i, state 1
q=0 Z_iZ_j, state 2
q=0 Z_iZ_j, state 1
q=0 flip-flop, state 2
q=0 flip-flop, state 1
