mean Z
Theorem A covers 100%, never vacuous
statistical band covers 26%
mean X
Theorem A covers 100%, vacuous from 4 ms
statistical band covers 38%
mean Y
Theorem A covers 100%, vacuous from 4 ms
statistical band covers 44%
flip-flop (4,5)
Theorem A covers 100%, vacuous from 1.5 ms
statistical band covers 85%
ZZ (4,5)
Theorem A covers 100%, vacuous from 1 ms
statistical band covers 88%
charge-2 pair (4,5)
Theorem A covers 100%, vacuous from 2 ms
statistical band covers 71%
|data - X15 prediction|
t (ms)
statistical band 1.96 sd_boot
Theorem A, 95% band
Corollary A.1 (BEQS form)
osc(O): vacuous above
initial state 1
initial state 2
